PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA 8.38) with hands-on experience in Machine Learning, full-stack development, and data analytics across 2 internships. Proficient in Python, SQL, React, and Django; built ML pipelines achieving 95% accuracy and analytics workflows over 284K+ records. Strong foundation in DSA, OOPs, DBMS, and Computer Networks; delivered 5+ production-grade projects end-to-end.

EDUCATION

VIT Bhopal University — B.Tech in Computer Science and Engineering

2023 – Present

CGPA: 8.38/10

EXPERIENCE

Data Analyst Intern — Bluestock Fintech

Jun 2025 – Present

- Processed and validated 10+ mutual fund datasets using Python, Pandas, and NumPy, improving data quality and consistency.
- Designed a SQLite database with 6 fact/dimension tables; managed data using SQLAlchemy for efficient storage and retrieval.
- Developed 10+ SQL queries to analyze NAV trends, AUM distribution, SIP inflows, and investor transaction patterns.
- Built an end-to-end financial analytics workflow covering 4 stages — data cleaning, validation, database design, and reporting — using Python, SQL, and Git, cutting manual reporting effort by 40%.

Software Development Intern — HEDGE5, Bangalore

May 2025 – Aug 2025

- Developed a Biogas Calculator for sustainability initiatives, automating 5+ manual input calculations and reducing estimation time by ~60%.
- Designed and deployed the company website across 5+ pages, now live and indexed on Google within 2 weeks of launch, improving online visibility.
- Gained hands-on exposure to SaaS product workflows across 3-month internship, contributing to agile sprints and 2 end-to-end deployment cycles.

PROJECTS

Credit Card Fraud Detection System | Python, Scikit-learn, Streamlit

GitHub

- Trained a Random Forest Classifier on 284K+ transactions; achieved 99.96% accuracy, 94% precision, and 87% F1-score through feature scaling and preprocessing.
- Built an interactive Streamlit app for real-time transaction prediction and bulk CSV fraud analysis with instant result visualization.
- Engineered an end-to-end ML pipeline with model serialization, reducing inference setup time and enabling seamless one-command deployment.

Multiple Disease Prediction & Healthcare Recommendation System | Python, Scikit-learn, Streamlit

GitHub

- Unified 3 ML models for Diabetes (75–85%), Heart Disease (80–88%), and Parkinson's (85–90%) prediction on a single platform.
- Implemented probability-based risk scoring and hybrid clinical threshold logic, improving prediction interpretability across 3 disease modules.
- Deployed Streamlit app delivering real-time predictions under 2 seconds; integrated 1 external API for nearby hospital navigation support.

FOSSEE Workshop Booking System — UI/UX Enhancement | React, Django, Bootstrap

GitHub | Demo

- Delivered a fully responsive mobile-first interface; reorganized workflows for 2 user roles across 20+ frontend components.
- Improved accessibility, typography, and UI consistency, reducing user navigation steps by streamlining 3 core approval workflows.
- Modernized UX with optimized interaction flows and responsive layouts while preserving 100% of existing backend functionality.

TECHNICAL SKILLS

Languages: C++, SQL, Python, JavaScript **Web:** HTML, CSS, React, Django, Streamlit, Firebase

Databases: SQLite, SQLAlchemy, DBMS **Core CS:** DSA, OOPs, Computer Networks, DBMS

ML & Data: Scikit-learn, Pandas, NumPy, Feature Engineering **DevOps:** Git, GitHub

CERTIFICATIONS

Applied Machine Learning — Coursera | **Cloud Computing** — NPTEL, IIT Kharagpur

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

LEADERSHIP & ACTIVITIES

Cricket Team Captain — Led team strategy and coordination for inter-college tournaments.

TCS Recruitment Volunteer — Assisted in campus recruitment logistics and candidate coordination for 500+ applicants.
