

JOB DESCRIPTION

PRODUCT & OPERATIONS ASSOCIATE INTERN

ABOUT WORK2HIRE

Work2Hire is an AI-driven career development and recruitment platform operated by Rozgar Career Tech Private Limited. We work with leading educational institutions, including IITs and IIMs, to support students through technology-enabled career development, mentorship, recruitment, and placement-readiness solutions.

POSITION DETAILS

Position: Product & Operations Associate Intern

Number of Positions: 1

Duration: 6 months

Work Mode: On-site

Location: Bhopal, Madhya Pradesh

Eligible Batches: 2026 and 2027

Eligible Branches: all b.tech branches

INTERNSHIP PACKAGE

Total Monthly Package: ₹30,000

ROLE OVERVIEW

We are looking for a proactive Product & Operations Associate Intern who can contribute to product planning, execution, data analysis, and day-to-day business operations.

The selected candidate will work closely with technical and business teams to convert ideas into structured requirements, coordinate execution, monitor performance, and improve operational processes.

KEY RESPONSIBILITIES

- Support product planning, prioritisation, and execution
- Convert ideas and user problems into PRDs, user stories, workflows, and actionable tasks
- Maintain product roadmaps, priorities, deadlines, and delivery trackers
- Coordinate with developers, designers, business teams, and other stakeholders
- Support UI/UX planning and review product workflows
- Analyse product, user, and operational data
- Create reports, dashboards, trackers, and actionable insights
- Track KPIs, product metrics, team performance, and project progress
- Create and maintain SOPs, documentation, reports, and workflows
- Conduct market research, competitor analysis, user research, and product research
- Identify bottlenecks and recommend process improvements
- Support recruitment, institutional coordination, and other business operations
- Assist with AI-powered products and automation workflows

REQUIRED SKILLS

- Strong product thinking and understanding of product development
- Ability to prepare PRDs, user stories, workflows, and task plans
- Product roadmap and deadline management
- Understanding of UI/UX principles
- Strong project coordination and operational-management abilities
- Proficiency in Microsoft Excel and Google Sheets
- Ability to analyse product and operational data
- KPI tracking, reporting, and documentation
- Strong written and verbal communication
- Market, competitor, user, and product research
- Basic understanding of APIs, databases, and software development
- Understanding of AI/ML and AI-powered products would be preferred
- Familiarity with Notion, Jira, Linear, Trello, Figma, Slack, Google Workspace, or similar tools

WHAT WE VALUE

- Ownership and execution over theoretical knowledge
- Ability to balance product planning with operational execution
- Strong communication, organisation, and attention to detail
- Ability to coordinate stakeholders and ensure timely delivery
- Adaptability, initiative, and a problem-solving mindset
- Hands-on experience through startups, internships, college projects, product building, event management, or student leadership

ELIGIBILITY

- Students graduating in 2026 or 2027 may apply
- Students from all the disciplines are eligible
- Applicants must be available to work on-site in Bhopal for the complete six-month duration
- Relevant internships, startup exposure, product projects, leadership roles, or operational experience will be preferred

SELECTION PROCESS

1. Resume and profile screening
2. Role-specific assignment or case assessment
3. Functional interview
4. Final HR discussion

PPO/FULL-TIME OPPORTUNITY

Upon successful completion of the three-month internship, the intern may be offered a Pre-Placement Offer (PPO) for a full-time position, with an annual CTC ranging from ₹8 LPA to ₹10 LPA.

The final offer and compensation will be determined based on the intern's performance, technical proficiency, contribution during the internship, overall suitability, and organisational requirements.
